

CONTENTS

Synopsis	3
Dedication	3
Contents	4
Forward	6
Preface.....	8
About The Authors	9
Introduction.....	10
Acknowledgements.....	13
CHAPTER 1 Why Space?.....	14
CHAPTER 2 The Current, Dysfunctional U.S. Space Policy	17
I. The Apollo Program.....	17
II. The Shuttle Program.....	18
III. The Post-Shuttle Era.....	18
CHAPTER 3 A Space Policy Based on Clearly Stated Goals	21
I. What’s Wrong with the Apollo mission Model	21
II. Privatization and Reusable Rockets	23
III. Space Infrastructure and Construction	24
IV. Humans, Robots, or Both?	26
V. The Critical Role of the Unmanned Space Program	26
VI. International Space Station Use.....	28
VII. Setting Appropriate Goals	31
VIII. High Mass vs. Low Mass Missions - Transport Design to support Goals	34
CHAPTER 4 Cheap Access to Space.....	35
I. Newspace Vs. Oldspace	35
II. Rockets	37
III. Air-Breathing Space Launch Vehicles	65
IV. Ultra-High Launch Acceleration Methods	78
V. Other Exotic Launch Methods.....	80
CHAPTER 5 Cis-lunar Space and Beyond	83
I. What Is Space Development? How To Get It Started.....	83
II. Why Cis-lunar?.....	84
III. Advocating for an integrated cis-lunar, Lunar and Mars development program	84
IV. Moon and Mars	86
V. Main Propulsion Choices in Space.....	86
VI. Synergy of Vehicles and Infrastructure.....	89
VII. Space Infrastructure - Location and Types.....	90
VIII. Overview of Construction in Space.....	108
IX. Material Supply	124
CHAPTER 6 Lunar Development and Resources.....	128
I. Rationale and Support	128

II.	Lunar Ferries	130
III.	Material Buildup for surface base at L1	139
IV.	Landing and Setup Sequence for Lunar Base.....	140
V.	Lunar vs. Mars Base Testing Environment	147
VI.	Moon In-Situ Resource Utilization	150
VII.	Lunar Settlements.....	163
VIII.	Large lunar Vehicles.....	165
CHAPTER 7	Access to Mars – Getting to Mars Orbit.....	166
I.	Support Grows for Fully Reusable Mars Architectures	166
II.	Rationales for Human Exploration to Mars	167
III.	High Mass Mars Mission Methods	183
IV.	Earth to Mars Orbit - How to Transit to Mars –.....	209
V.	Mars Orbit Phase	237
VI.	Earth Return Scenarios	248
CHAPTER 8	Access to Mars – Orbital to Surface Operations	255
I.	Mars Orbit to Surface	255
II.	Reusable vs Expendable Landers	262
III.	4 Vehicle Reference Papers - Expendable Landers.....	263
IV.	Other Factors for Reusable Ferry Design.....	271
V.	Access to Mars (AtM) Ferry Design	283
VI.	LMO to Surface Logistics	316
VII.	Conclusions for Integrated Mars Transport and Base System	325
CHAPTER 9	Mars Base Site Selection and Operation	329
I.	Mars Science and Development Bases.....	329
II.	Directions for Subsequent Expeditions	363
CHAPTER 10	Space Solar Power and Carbon Fuel Replacement	366
I.	Solutions in Space	368
II.	Space Solar Power Systems.....	370
III.	Building a Space Solar Power System	374
Appendices.....		379
I.	Why Space? – Outline in Economic Order	379
II.	Crystal Ball predictions Section	381
III.	Space Transport Basics.....	384
IV.	Cis-Lunar and Mars Mission Logistics Tables.....	401
V.	Engineering Appendixes	426
VI.	List of Potential Mars Human Landing Sites	437
References.....		440
List of Figures		461
List of Tables		467
Glossary / Acronyms.....		470
Index		491
