CONTENTS

Synopsis 3
Dedication 3
Contents 4
Forward 6
Preface 7
About The Authors 8
Introduction 9
Acknowledgements 12

CHAPTER 1 Humans Operating in the Solar System 13
CHAPTER 2 The Settlement of Mars 17

I. Should we Settle Mars? 18
II. Settlement Site Selection 20
III. Requirements for Settlement Startup 20
IV. Moving People to Space or Surface Settlements 22
V. Mars In-Situ Resource Utilization 38
VI. Food production and plant growth 58
VII. Power Production 67
VIII. Settlement Expansion and Architectural Development 72
IX. Mars Settlement Psychological Challenges 81

CHAPTER 3 Asteroids: Threat or Resource? 83

I. Access to Asteroids for protection and as a materials source 83
II. Asteroids as a Threat 84
III. Asteroids as a Material Source 86

CHAPTER 4 The Settlement of Space 123

I. The Rationale for Space Settlements 124
II. Arguments Against Space Settlement 125
III. Surface vs. Rotating Settlements 126
IV. What is a Rotating Space Colony? 127
V. Rotation Rates for Space Colonies 128
VI. Three Main types of Rotating Settlements 129
VII. Radiation Protection for Rotating Space Colonies 133

CHAPTER 5 Building a Rotating Settlement in Space 135

I. Additive Manufacturing 136
II. Economics of Building a Rotating Space Colony 137
III. Energy, Shielding and Transport of a Rotating Space Colony 159
IV. Operation of a Rotating Space Colony 166

CHAPTER 6 Terraforming 174

I. Terraforming Classification and Overview 174
II. Thermal and Optical Terraforming 181
III. Water and Ocean Terraforming 184

IV.	Atmospheric Terraforming	211
V.	Limitations of Terraforming	219
VI.	Opposition to Terraforming	221
VII.	Terraforming of Mars	222
VIII.	Terraforming of Venus	241
IX.	Terraforming to Protect the Earth	246
X.	Planetary Areas, Masses, Volume Data	248
CHAPTER 7	Starships Without Magic	250
I.	Super-Physics or Not	250
II.	Is Interstellar Travel Feasible or Desireable	252
III.	Starship Concepts	253
IV.	Slow Boat Starship Realities	262
V.	Integrated Ship Design	268
VI.	Slow Boat Psychological Challenges	305
VII.	Modularity and Survivability	306
VIII.	Hibernation Scenarios	306
IX.	Arrival in the new Solar System	308
CHAPTER 8	Exoplanets are Beckoning	310
I.	Rationale	310
II.	Exoplanets	312
III.	Infrastructure and Industrial build-up in the new system	334
IV.	Terraforming An Exoplanet	336
